NILES TWO-PIECE TRU-JOINT

Niles Two-Piece Tru-Joint	Length	Ctns/Pallet
1/2"	10'	25
3/4"	10'	25
7/8"	10'	25

15pcs/ctn – 150' per ctn

The Niles Two-Piece Tru-Joint is used to relieve stress caused by expansion and contraction and initial stucco shrinkage. The opening adjusts from 1/4" to 5/8" and is ideally used where more movement is expected than would be normal with a one-piece expansion control joint. Manufactured to meet or exceed the following ASTM specifications:

- ASTM A653 - Standard specification for steel sheet, zinc-coated (galvanized) or zinc-iron alloy coated (galvannealed) by the hot-dip process
- ASTM C841 - Standard specification for installation of interior lathing and furring
- ASTM C1047 - Standard specification for gypsum wallboard and gypsum veneer base accessories
- ASTM C1063 - Standard specification for installation of lathing and furring for portland cement- based plaster
