FHA #7 FOUNDATION WEEP SCREED

| #7 Foundation Weep Screed | Flange Size | Ctns/Pallet |
|----------------------------------|--------------------|--------------------|
| 1/2" | 3 1/2" | 25 |
| 5/8" | 3 1/2" | 25 |
| 3/4" | 3 1/2" | 25 |
| 7/8" | 3 1/2" | 25 |
| 1" | 3 1/2" | 25 |

10' Lengths – 25 pcs/ctn – 250' per ctn

The #7 Foundation Weep Screed is used to provide a weep mechanism as part of the drainage system as required at the bottom of all framed walls; by all major building codes and the International Building Code in ASTM C1063. The larger holes in the ground flange are drainage holes as the entire surface of the sloped ground provides for drainage once the stucco has hydrated and shrinkage has occurred. The 3-1/2" nailing flange serves as a flashing when water resistant, breathable building paper or paper backed lath is installed over the flange.

ASTM C653 - Standard specification for steel sheet, zinc-coated (galvanized) or zinc-iron alloy coated (galvannealed) by the hot-dip process
ASTM C841 - Standard specification for installation of interior lathing and furring
ASTM C1047 - Standard specification for gypsum wallboard and gypsum veneer base accessories.
ASTM C1063 - Standard specification for installation of lathing and furring for Portland cement-based plaster
ASTM C1861 - Standard Specification for Lathing and Furring Accessories, and Fasteners, for Interior and Exterior Portland Cement-Based Plaster
